

Transparent Push Fit Type Meter Enclosures

An Innovative solution to house energy meters. This is a light weight , easy to install solution that is convenient and flexible. Transparent Push Fit Type Meter Enclosures are demonstrably superior to conventional steel enclosures which tend to rust. No more pilferage, no more safety issues and no more corrosion.

The meter enclosures are made from Transparent / impact modified Polycarbonate and moulded in house to meet the requirements for a low cost , high durability solution.

The enclosures have push fit type of locking system in which the box once closed and sealed cannot be opened without breaking the box, thereby recording tamper.

Transparent Push Fit Type Meter Enclosures are the most affordable way of providing tamper proofing to the meter installation as it provides first line of defense against the meter.

KEY FEATURES

The new standard in metering enclosures from the leader in the field. Made from specially designed high quality polymers to give you the best price - performance ratio.

Tamper Proof : Totally concealed Pushfit locks with anchor type seals

Fire retardant , resistant to corrosion and rust proof

Aesthetic looks that look good even after years.

Light weight and easy to install , rugged and durable.

No chance of electrical shocks. Much safer than conventional metal enclosures.

Accommodates any make of meter with requisite clearances.

Wide range available in Single Phase and Three Phase enclosures with and without MCB protection for maximum flexibility.

Manufactured in our ISO 9001: 2000 and ISO 14000 facility under strict quality control
